

Pierpaolo Goffredo

PH.D. IN ARTIFICIAL INTELLIGENCE

Altamura, Bari, Italy

✉ pierpaologoffredo@gmail.com | 🏠 19 Jul 1996, Italy | 📧 pierpaologoffredo | 🌐 pierpaologoffredo | 🎓 Google Scholar

Professional Summary

AI/NLP specialist and Innovation Pilot at ALTEN SA, directing multiple AI and NLP projects within the R&D department, leveraging an experimental environment that enables testing of new technologies and innovative approaches. Ph.D. in AI (Université Côte d'Azur), with a record of building production-ready NLP systems and publishing at top-tier venues (EMNLP, AAAI, IJCAI, ACL). Leading strategic projects in recommender systems, multimodal RAG, event detection in political debates, and predictive analysis of cryptocurrency lifecycles through correlations with external events (finance, economy, politics, social media, healthcare). Experienced in mentoring interns/PhD candidates and driving adoption of LLMs, Generative AI, and advanced ML/DL to deliver scalable prototypes with measurable impact.

Experience

Alten SA

Valbonne, France

INNOVATION PILOTE

June 2025 - Current

- Lead strategic AI/NLP innovation projects, defining technical direction and research goals.
- Architect Recommender Systems and Multimodal RAG solutions integrating text, audio, and video.
- Oversee development of multimodal AI models for automated key-moment detection in political debates.
- Mentor and coordinate interns and PhD candidates, ensuring scientific rigor and delivery quality.
- Promote adoption of LLMs, Generative AI, and advanced ML techniques to accelerate R&D outcomes and prototype transition.
- Direct a predictive analysis project on cryptocurrency life-cycles, correlating blockchain data with external events in finance, economy, politics, social media, and healthcare

Université Côte d'Azur

Sophia Antipolis, France

NLP RESEARCH ENGINEER - PH.D. PROJECT

Sep 2021 - Dec 2024

- Designed and implemented end-to-end NLP pipelines for argument mining and fallacy detection in political debates
- Built scalable text classification systems using transformer-based architectures, achieving state-of-the-art results
- Led development of production-ready ML models with comprehensive testing and quality assurance protocols
- Collaborated with cross-functional teams to integrate ML solutions into existing systems
- Published research demonstrating system effectiveness at top-tier conferences (EMNLP, AAAI, IJCAI)

Université Côte d'Azur

Sophia Antipolis, France

LABORATORY TEACHER

Oct. 2021 - June 2024

- Developed and delivered hands-on ML/Deep Learning courses focusing on practical implementation
- Created comprehensive testing frameworks for student ML projects
- Mentored students in building production-ready NLP applications
- Demonstrated strong communication and presentation skills in technical contexts

Education

Université Côte d'Azur

Sophia Antipolis, France

PHD IN COMPUTER SCIENCE

Sep. 2021 - Dec. 2024

- Thesis Title: **Analysing and Unveiling Argumentative Fallacies in Political Debates. A use case on the U.S. Presidential Debates from 1960 to 2020**

Università degli studi di Torino

Torino (TO), Italy

MASTER'S DEGREE - 110/110 CUM LAUDE AND RECOMMENDATION FOR PUBLICATION

Oct. 2018 - Apr. 2021

- Degree Title: Artificial Intelligence and Information Systems "Pietro Torasso"
- Master Thesis Title: **Counter-TWIT: A Corpus for the Automatic Detection of Counterspeech in Italian Twitter**
- Implemented machine learning models for pattern recognition in multilingual contexts

Università degli studi di Torino

Torino (TO), Italy

BACHELOR'S DEGREE - 110/110 CUM LAUDE

Sep. 2015 - Oct. 2018

- Degree Title: Information and Knowledge
- Bachelor Thesis Title: **Design and development of cross platform components for donations with cryptocurrencies: Informatici Senza Frontiere's case**

Publications

DISPUTool 3.0: Fallacy Detection and Repairing in Argumentative Political Debates

Vienna, Austria
July 2025

ACL 2025

- Developed an integrated NLP framework for multi-layer analysis of political debates
- Implemented automated fallacy detection and repair using state-of-the-art LLMs
- Expanded debate coverage and visualization tools for comprehensive argumentative insights

Argument-based Detection and Classification of Fallacies in Political Debates

Singapore
Dec. 2023

EMNLP 2023

- Developed scalable NLP system for real-time argument analysis
- Implemented comprehensive testing suite for model robustness

DISPUTool 2.0: A Modular Architecture for Multi-Layer Argumentative Analysis of Political Debates

Washington, DC, USA
Feb. 2023

AAAI-23 SPECIAL PROGRAMS, STUDENT PAPERS AND DEMONSTRATIONS

- Designed modular ML architecture for production deployment
- Created extensible framework for multi-task NLP analysis

Fallacious Argument Classification in Political Debates

Wien, Austria
Jul. 2022

IJCAI-ECAI 2022

- Implemented novel classification system for real-time argument analysis
- Developed robust evaluation framework for argument quality assessment

Counter-TWIT: An Italian Corpus for Online Counterspeech in Ecological Contexts

Seattle, Washington, USA
Jul. 2022

WOAH 2022

- Created and curated large-scale dataset for pattern detection
- Developed data processing pipeline for multilingual text analysis
- Applied natural language processing techniques to identify specific linguistic patterns

Technical Skills

NLP & ML Engineering	Production-ready ML/DL systems, NER, Text Classification, Large Language Models (LLMs), Recommender Systems, Generative AI, RAG, Graph DB
ML System Design	End-to-end ML pipeline development, Model deployment, Testing and Quality Assurance
ML Frameworks	PyTorch, TensorFlow, Hugging Face, Docker, Ollama, LangChain
Programming	Python, Java, SQL, REST APIs

Languages

Italian	Mother Tongue
English	First Certificate in English, Cambridge - Level B2
French	Professional - Level B2
